Madam:

**INTERVIEW SUMMARY**

Applicant thanks the Examiner for granting a telephone interview on November 26, 2008, for the above-captioned application. Applicant reviewed the Interview Summary, sent December 11, 2008 (hereinafter "*Interview Summary*") and would like to clarify the statement made by the Examiner that: "App pointed out compounds on p7 of OA are different from spec." While it is correct that during the interview Applicant indicated uncertainty about where the Examiner found the listed compounds in the specification. Applicant subsequently identified support for these compounds in the specification, and furthermore, determined that the list assembled by the Examiner was missing several compounds specifically described in the specification. Applicant therefore submitted a response dated December 5, 2008 that, *inter alia*: (a) provided "Table 2" detailing the specification support for those additional species that Applicant claims; (b) presented amendments to the claims to recite those additional species presented, as correctly noted in the Interview Summary; and (c) amended typographical errors in the claims, also correctly noted in the Interview Summary.

Respectfully submitted,

**Date: January 9, 2008**
